APPLICANT : KARL JIMUKI KK;

INVENTOR : MORI CHUZO;

INT.CL. : B26D 7/22 B26D 7/26

TITLE : CUTTER BLADE HOLDER

ABSTRACT : PURPOSE: To provide a cutter blade holder facilitating the replacement of a cutter blade .

CONSTITUTION: A U-shape recessed part 901 is formed at the center part of a holder body 9, and a clearance for inserting a part of a cutter blade 8 is formed on the lower side of the bottom part of the U-shape recessed part 901. The shaft of a holding member 504 is thereby inserted into a hole 801 bored at the center of the cutter blade 8, so that the cutter blade 8 can be taken out of a holder along the U-shape recessed part 901 while holding a handle 506. In the case of storing the cutter blade 8 in the holder body 9, a part of the cutter blade 8 is inserted into the clearance to fix the cutter blade 8 onto the holder body 9 side, and the holding member 504 can be separated from the cutter blade 8 in such a way as to separate the cutter blade 8 from the magnet of the holding member 504, so that the cutter blade 8 can be replaced without touching it.
